

Key coding - reordering made easy!

Would you like to order your keys from the comfort of your own home?

With the WILKA key coding, this is very easy and convenient to do. The keys of the W3600 as well as the standard profile from WILKA have an engraved coding which ensures unique allocation. The new coding of the keys offers many advantages:

- Keys and cylinders can be ordered simply by specifying the code.
- No need to submit a sample key to determine the lock.
- The code means that the lock and therefore the technically precise cut depths are known.
- Ordering by telephone from a specialist dealer is possible by reading the code. Personal contact is not necessary.
